

# New Era Meter

Smart Revenue-Grade Electric Meter

Connected By  AT&T

## Cellular Communication Option

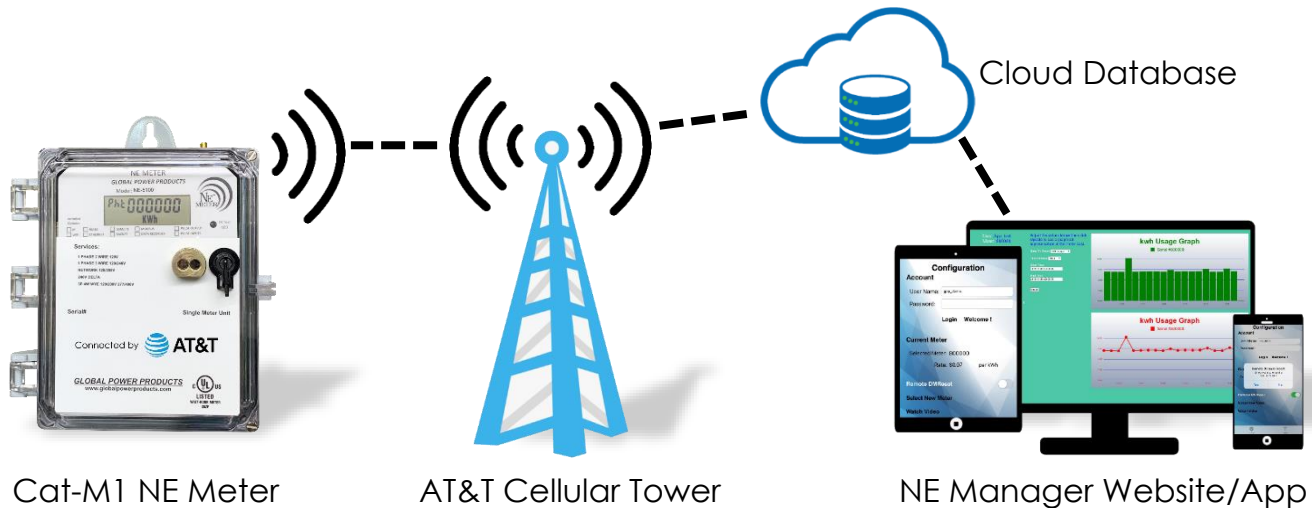

Our cellular communication option makes collecting meter data easier than ever before! Connected by AT&T, this cellular option utilizes the latest in LTE Cat-M1 technology and requires ZERO setup by the customer. Cat-M1 is a low-power wide-area (LPWA) technology that offers a highly secure, cost-effective, and extremely reliable way to upload meter data. This is the first network to operate on a dedicated spectrum optimized for IoT which allows it to thrive in even the most challenging environments.

### RELIABLE

This cellular option utilizes AT&T technology to ensure an extremely reliable connection from **anywhere in the US**. Our Cat-M1 module has excellent coverage and great building penetration making it perfect for hard-to-reach areas like basements, rooftops, cement structures, and areas where there is no on-site network.

### EFFORTLESS

Our Cat-M1 communication card connects to the internet with **zero setup required**. Simply power on your Cat-M1 enabled device and watch as meter data is automatically uploaded to the NE Manager website. Collecting your meter data has never been more straightforward!
